

MICROSOFT AZURE APP BUILDER PROFILE: ASSIMILATED INFORMATION SYSTEMS

Assimilated Information Systems is an established software development company with a vision to create solutions to improve productivity, digitization, document automation, and paperless processes. DocFusion 365 is a dynamic, template-driven document generation engine designed to help you enhance your document content and processes.

WHAT WE OFFER

Compose

Generate documents in batches, or on demand using API Apps, Microsoft Azure Service Fabric or Azure Worker Roles, fusing document parts enriched by data sourced from various data sources, including SharePoint, Dynamics CRM and more.

Process

Manage generated document content by designing custom processes and workflows with DocFusion Azure Cloud Services and Microsoft Flow.

Scalable

Now hosted on Azure, the DocFusion Document Generation Engine, with a proven history of reliability, scalability and low-latency, is further enhanced with Microsoft Azure Service Fabric and worker roles for auto scaling.

High Availability

Hosting DocFusion on Microsoft Azure guarantees high availability, meaning you don't have to worry about losing time because of server crashes, upgrades, etc.

WHAT OUR CUSTOMERS ARE SAYING

"The addition of the DocFusion services enabled our platform to source our own electronic documents, resulting in huge cost savings in terms of paper, printing, storage and time." – Debbie Visser, Project Manager, ABSA

Microsoft Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

KEY USE CASES

WEB APPLICATIONS

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC

Get actionable insights from your data by taking advantage of a fully compatible enterprise-ready Hadoop service.

MOBILE

Accelerate your mobile app development by using a backend hosted on Microsoft Azure. Scale instantly as your install base grows.

MEDIA

Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

FLEXIBLE APPLICATION MODEL

Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE

Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES

Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH

With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
